Heme-FX™ contains iron called iron bis-glycinate chelate which belongs to a new class of nutrients called glycines or bisglycines. These types of supplement ingredients consist of essential minerals that have been bonded to glycine with citric acid, and they are far more bioavailable and less harmful than previous supplement-grade nutrient classes.

## Benefits of Heme-FX

- Very Mild Side Effect Profile
- More Bioavailable
- Lessens Oxidative Damage
- Aids in Fighting Anemia
- More Autoimmune Friendly

REVEAL YOUR POTENTIAL

# HEME-FX

## Snapshot:

- Heme-FX™ is the most unique iron product on the market which has been clinically proven to improve blood levels of ferritin and other iron indicators.
- Heme-FX™ provides 25 mg of ferrous bis-glycinate chelate (iron).
- This unique form of iron is bound to amino acids to produce a natural organic compound that can pass easily through the intestinal wall.
- This product is easily absorbed without causing nausea or constipation due to its organic form.
- Heme-FX includes 100 mg per capsule of betaine HCL and 150 mg of vitamin C to further support iron absorption.\*
- For best results, avoid consuming Heme-FX™ on an empty stomach.
